

# Simonas Sabaliauskas

I am shifting my career towards IT, recently having expanded my knowledge by programming and making games. For the past five years, I have been studying Computer Science and Programming independently and through courses. Everything I learned in Retail, Production and Logistics can be applied to many roles in Tech.

## Languages

- Lithuanian (native)
- English (fluent)
- German (basics)

## Tech skills

- Programming languages: C# (.NET, ASP.NET MVC), C, Python
- IDEs: Visual Studio, Unity
- Databases: SQL (MS SQL Server, SQLite), NoSQL (MongoDB)
- VCS: Git, GitHub
- Web Development: HTML, CSS, JavaScript, Flask (Python), Razor Pages (C#)

## Experience highlights

### 2022 October - 2023 December

#### Girteka Europe West

Customer Care Manager

Main responsible person for individual transport projects.

- FTL transport service management across Western Europe, including the UK.
- Administration of orders; checking Transport and Sales depts. compliance.
- Department coordination (Accounting, Transport, Sales, Planning).
- Occasional sales of non-contract (spot) shipments.
- Proficiency in legacy (MS Dynamics AX) and new (SAP) software systems; use of personal data sorting filters to enhance client service.
- Intensive communication workload (email, phone, conference call).
- EU-UK customs documentation handling.

### 2019 May - 2022 August

#### AB Pieno Žvaigždės

Dairy Production Operator

Operation and maintenance of curd and whey production machinery.

- Single-person operation of whey production plant (refinement, maintenance, logging, production offloading).
- Responsibility for producing curd within the requirements.
- Assistance in creating plant operation instructions.

## Education

### 2024 May - June

#### Vilnius Coding School

C# Programming (.NET) - 200 hours (5 weeks)

- Object-oriented programming, databases and version control using Git.
- Significant project: Car Rental application (prototype)
  - From a console app to an API with a front-end Razor Pages website.
  - Dapper and Entity Framework with MS SQL Server, and MongoDB.
- Final project: Game Leaderboard API (prototype)
  - Track players and scores in a database for a game, using both relational and non-relational databases for educational purposes.

### 2019 - 2024

#### edX (Harvard Online Course)

CS50x ~ 300 hours (self-paced)

I earned a Verified Certificate.

- Learning basics through C.
- C translation to Python: program performance and coding efficiency trade-off.
- Querying SQL database for information to solve a crime detective game.
- Integrating Python into websites using Flask (basics of HTML, CSS, JS).
- Final project: 2-player Pong game called PingPong made with Unity.

### 2013-2018

#### Vilnius University

Molecular Biology Bachelor

Bachelor thesis research conducted in Nature Research Centre in Vilnius.
